Subject: RE: Draft BOF workshop agenda

Hi Peter

Per my voice message:

For the BOF WQ Workshop June 23rd we would like to add ODFW (Dave &/or Bruce) to the Topic 2 presentation. It would be DEQ, ODFW, EPA, and NOAA. ODFW would provide information similar to that discussed at the meeting with OFIC; on the need for stream complexity and natural thermal regimes for protecting and restoring salmonid populations.

For the EQC Meeting on June 19th, current format is to have ODFW and EPA present with DEQ on the informational item: "Water quality management approach for temperature". This would be similar or the same information that would be presented at the BOF WQ Workshop. Do you want to be included as one of the presenters for the EQC informational item, or there to answer questions about FPA if/when they come up?

thanks
Gene
